

WORLD CNG

CNG Conversion Services

The 2009-2012 World CNG Ford E-Series Van is the perfect solution for fleets and companies looking to make the switch to a cleaner, less expensive fuel, yet make no sacrifices in power, utility, or fuel efficiency! Using the standard 5.4L V8 engine, the E-Series Van is converted to the compressed natural gas fuel system while still maintaining the factory 15 miles per gallon rating. Each CNG conversion is tailored to our customers' needs, with a typical CNG capacity ranging between 20.0 and 30.0 GGE. Interior space is maintained so that the CNG fuel tanks do not take up precious cargo space.

Tank Configuration

Ford E350 Van

All World CNG natural gas conversions feature electronically controlled solenoid valves on all cylinders and flexible high-pressure tubing. All tank cradles feature stainless steel tank shielding custom manufactured by World CNG.

Optional upgrade items include the following:

- Digital pressure gauge for improved fuel consumption monitoring.
- Rear cargo area luggage rack.

All WorldCNG Conversion systems are installed in compliance with NFPA-52/FMVSS standards and NGV2-2010 guidelines.

CARB and EPA Certified

Warranty: 3 years/36,000 miles on emission-related components
