

WORLD CNG

NEW CNG FINANCING PROGRAM

Financing Details

- Retail or Business customer
- Trac Lease or SBA loan
- Minimum 10% Downpayment

Finance CNG vehicle conversion on new or used

World CNG is excited to announce a financing program which allows retail or business customers when purchasing a CNG vehicle to roll nearly the entire the cost of the conversion upfit into the total vehicle price. In the past, most customers have had major issues with lenders being willing to finance a CNG conversion of \$13,500 on a \$25,000 truck. Lenders required the borrower to pay most of the upfit cost out of pocket, which prevented some transactions from being completed.

We now have a program that only requires 10% down on the entire price of the vehicle, including the CNG upfit. This allows customers to keep more money in their pocket and start enjoying the savings of 30% less fuel cost.
